HANDPAINTING

Handpainting can be applied to nearly any tile design, and represent a unique opportunity to enhance your project.

A two-step glazing process is used: First, colors are hand brushed to accent relief ornament. Second, the hand painted decoration is covered with a colored glaze. Nearly any color glaze can be applied over, except White M-200, White Crackle RC-290, Pearl M-477-A and Chalk M-488: they are too opaque and will hide the handpainting they cover.

Please contact a dealer for details on Handpainting.

NATURAL BEAUTY

Familiar motifs make Fruit and Garden patterns natural selections for the kitchen. The designs are rendered with minimal stylization, maintaining their innate character and natural beauty.

Pressed in special moulds, our exclusive designs are embossed with deep relief which interact with glazes and handpainting, revealing their handwrought character.

Numerous designs, with favored motifs, are available to enhance your special installation.
